RANCILIO
coffeeing the World

CLASSE 10 RE

Pure technology

Classe 10 RE incorporates a special mechanical system that ensures an espresso of an extremely high quality. The combination of the RE group with Classe 10 creates a product of outstanding excellence for true connoisseurs.

1 RE GROUP The special RE mechanical system conserves the traditional method of making an espresso. The manual action gives the operator great control over coffee brewing times. The ideal machine for expert baristas with a passion for their art.

2 C-LEVER (Rancilio Patent) The new steam valve with a special control knob and ergonomic design is complete with open-stay and open-close functions. The valve has a very short travel distance, and is operated by rotating it just 25°. Turning it upwards, it opens and remains in this position. Turned downwards, it automatically closes when released. Rapidity, precision and ergonomics: maximum user comfort for daily tasks.

3 CUP WARMER The electric cup-warmer allows cups to be kept at optimal temperature, a vital factor in the quality of an espresso coffee.
